

More additions to our airtightness range and new easy-to-use fitting instructions

NEW! Solar Cable Outlet Kit and Sealing Collars

Keep roofs watertight, windtight and airtight

Klober's Solar Cable Outlet Kit creates a watertight seal around cables passed through the roof. This new wind-tunnel tested product is available in 3 colours to match the roof tiles and allows additional cables to be added with ease. The Solar Cable Outlet Kit is suitable for cables with a diameter from 4 - 8mm and can be used on pitches from 20-50°. The Sealing Collar range has been expanded to suit diameters of 8-12mm, 15-22mm, 25-32mm, 42-55mm & 50-70mm.

NEW! Butylon® tape

Butylon® double-sided tape is used below battens or counter battens to seal nail penetrations through underlays. It can also be used to seal underlays, air barriers or vapour control layers (AVCL's) to rough and smooth surfaces in temperatures from minus 40°C to plus 80°C.

For more product information either speak to your Klober Area Manager, call 0800 783 3216 or go to www.klober.co.uk

NEW! Airtightness product fitting instructions

Understand where and how to use Klober's airtightness products

Whether for traditional ventilated cold roofs with insulation at ceiling level, non-ventilated cold roofs using vapour-permeable underlays or warm roofs with insulation at rafter level, a combination of Klober's air barriers, double-taped underlays, tapes, sealants and sealing collars will help achieve an 'airtight' roof. Our new Fitting Instructions provide easy to follow information on sealing roof membranes, counter battens, masonry, pipes and cables.

Ring us now on 0800 783 3216 for a copy or go to www.klober.co.uk.

One key airtightness fact you may find useful...

How to reduce CO₂ emissions by up to 15%

Alongside improvements in whole house air permeability, if you make the roof and ceiling airtight, not only can you cut down on heat loss and save energy, CO₂ emissions can be reduced by as much as 15%!

Latest news on our airtightness training with Roto

Klober : Roto training dates announced

Book now to take advantage of our next free airtightness training course

Following the popularity of our first two airtightness training courses organised in conjunction with Roto, the next course will take place on 22nd and 23rd June at Roto's Training Academy in Rugby. Making roofs airtight has clearly struck a chord with contractors, merchants, training colleges and the roofing media with an article reviewing the course by RCI's Assistant Editor Celia Copping in their April edition and also by Roger Bisby in Professional Builder magazine. The Centre is ideally located close to the junction of the M1 and M6 so why not take advantage of what has already been described by our first visitors as an immensely valuable insight into this increasingly important aspect of roofing.

For further details or to book places ring us now on 0800 783 3216.

News on other key Klober products

Klober flat roof vents and outlets

Klober provides a complete range of 70mm, 100mm and 125mm flat roof breather vents, soil / mechanical extract and rain water outlets. Suitable for bituminous and single ply systems, all are made from high impact, UV stable PVC, with many using patented seals designed for compatibility with cold-applied membranes. Vents are available with a unique screw-in connection for use with all single ply systems, while insulation and extension sleeves are available for both inverted and warm roofs.

And finally...

Klober on the move

New UK head office and distribution centre

May 3rd will see us take occupation of our new UK head office and distribution base on the 150 acre East Midlands Distribution Centre in Castle Donington. Managing Director, David Arendell, added, "Our existing premises were restricting the efficiency of our business and scope for development. The new 40,000ft² unit has a clear span and, being close to the M1, A50 and A42 will provide us with a central location for all parts of the UK. Most importantly, it also enables us to retain our experienced Shepshed workforce".

From 3rd May our new contact details will be:

Address: Unit 6F, East Midlands Distribution Centre
Short Lane
Castle Donington
Derbyshire, DE74 2HA

Sales tel: 0800 783 3216
Sales fax: 01332 814 033
Switchboard: 01332 813 050
